

Instructions to Authors

All manuscripts must be submitted through the journals online submission system at <https://www.bbrc.in> An author submitting the manuscript for the first time is required to register online and create a profile as an author. This enables author to receive login credentials for manuscript submission. An author declaration and submission of ethical statement /copy right forms is a mandatory part of a submission. Before submission, make sure that the manuscript conforms to the journal guidelines for the preparation of the manuscript. MS not prepared as per instructions to authors will not be entertained and will be returned as incomplete submission.

Please note that the journal does not charge any fees for submission of articles, and we do not give any fixed frame of time to publish an article, since the review of articles depends upon the reviewers processing time, the editorial assessment, and production. Roughly a MS takes about 60 to 90 days from the date of submission to publication, depending upon the review process and number of revisions envisaged.

Ethical & Plagiarism Policies of Biosc Biotech Res Comm ([Ethical Statement](#) /[Plagiarism Check Form](#))

Plagiarism is the unauthorized use or close imitation of the language and thoughts of another author and representing them as one's own original work and Biosc Biotech Res Comm condemns all forms of plagiarism following a very strict and vigilant policy of removing this malady. Within the academia, it is considered dishonesty or fraud and offenders are subject to academic censure. Plagiarism can be unintentional or intentional, reproducing academic material without appropriate credit to the original authors (Citations / References). Similarly self-plagiarism is the re-use of significant, identical or near identical portions of one's own work without citing the original work. This is also known as recycling fraud. Worst form of plagiarism is to steal the whole article from some journal and publish it under one's own name in another journal. Plagiarism, fabrication, unethical or redundant publication grossly violates the editorial policies of Biosc Biotech Res Comm., which follows best practice guidelines given by the International Committee of Medical Journal Editors (ICMJE) and Committee on Publication Ethics (COPE), as mentioned in the Journals Instructions for Authors.

The following need to be submitted with every manuscript

Cover letter: A letter stating the originality of research and why you think it should be published in Biosc Biotech Res Comm For Cover Letter Template [Click here](#)

Manuscript Text <https://bbrc.in/manuscript-template/>: The full manuscript containing first page with all author names, their affiliations and the corresponding author email addresses details, ORCID IDs, followed by full text of the MS file in word format not exceeding double spaced 20 pages or 4000 words.

All data/tables/figures/Images (images must be submitted with the MS in high resolution which can be reproducible in print format without losing their quality).

Article Types: Submission of the following article types is considered.

1. Original Research Articles
2. Critical Review Articles
3. Case Reports with Discussion
4. Rapid / Short Communications
5. Letters to the Editor/Editorials / Perspectives / Correspondence

1. Original Research Articles

All articles under submission to Biosc Biotech Res Comm should aim for the development of technological concepts rather than merely recording the facts. Incomplete studies and manuscripts not in strict compliance with the journals policies will be strongly discouraged. Manuscript must be written in good English, typed using Times New Roman font size 12 double-spaced with one and half inch margin on all sides. All manuscripts must be accompanied by author declaration and ethical certificate signed by the corresponding author and all co-authors that they have seen and approved the final version of the manuscript and that the article has NOT been published or submitted to any other journal for publication. The corresponding author is responsible for obtaining permission from the copyright owner for the use of any copyrighted material in the submitted article.

Each original article must contain the following in the order as:

1. Title page:

Title page should contain the following information:

Complete title of the article followed by short running title Name (s) of author(s) with ORCID link of the corresponding author (<https://orcid.org/login>) Department(s) Institution(s) with City/ Code and Country at which the work was performed Official /e-mail address of the corresponding author

2. Abstract: Abstract should be factual summarization of the entire work and should NOT exceed 250 words, it must have 5 keywords and must be written under the following subheadings:

1. Introduction/Objectives /Rationale
2. Methods
3. Results
4. Conclusion

3. Main text of the Manuscript: MS Text must be arranged under the following headings:

Introduction

Material and Methods

Results (Including Tables/Fig/Images)

Discussion

Conclusion

References

Ethics approval and consent to participate, Competing interests,

Funding Statement and Acknowledgements (if any)

Introduction This section should provide a brief survey of literature, purpose of the study etc.; the rationale of the study undertaken should be given with proper clarity.

Material and Methods: This section consists of material/methods and procedures, its should be concise but detailed enough to enable the reader to reproduce the experiments / methodology. Commonly used procedures and methods in detail need not be described, but require a reference or citation to the original source.

Results Section: Give only brief findings, presented in the form of tables or figures, should be included without duplication of presentation and no discussion of the significance of the data is required here, either tables or figures be given, Avoid duplication of data.

Discussion: Should present the significance of the present data under the prevalent understanding and interpretation of the phenomenon. Speculative discussion is allowed but it should be concise and corroborated by the presented data.

Conclusion: Summarizes the study and is drawn from the results and discussion, should not be more than 100 words.

Acknowledgements- if any, should be placed at the end of the text and before **References**.

References: References in text of the manuscript should be written using last author name (s) without their initials with year in PARENTHESES (). The final bibliography in the References section should be arranged alphabetically using last name of the author and written in Harvard Style as mentioned below:

All reference items must be in 11 point font, do not use any Italic styles *except for the scientific names of organisms, genera, species* in the References section. **In this section et al should be used only after three names of authors.**

DOI of references must be given for all PubMed, WoS, Clarivate Analytics, Scopus, Google Scholar and other references.

All references should be checked minutely, for their appearance in text as well as in References, incomplete or missing references in the text will not be accepted and the MS will be returned or rejected.

a. Reference of a Standard Journal Article:

Ali, Sharique A, S Salim, Sahani T, Peter J and Ayesha S Ali (2012c) Serotonergic receptors as novel target for optimizing skin pigmentary responses in Indian bull frog *Hoplobatrachus tigerinus* British Journal of Pharmacology Vol 165 No 5 Pages 1515-1525.

b. Reference of a book:

Falconer DC (1960) Introduction to Quantitative Genetics. Oliver & Boyd Edinburgh 165-185.

c. Reference from article in a book:

Ali, Sharique A, N Parveen and Ayesha S Ali (2021) In Herbal Medicine: Back to The Future, Promoting Melanocyte Regeneration Using Different Plants and Their Constituents - Vol 3 (Edited by Ferid Murad Nobel Laureate) Bentham Science USA Pages 247-276.

Tables and Figures (or Images): Tables and figures, complete with legends and footnotes explanations/units etc should be on separate pages not more than one page for each table. The tables and figures pages should be consecutively numbered and placed between results and discussion with same numbers. Position of the tables or figures in the text of the MS must be indicated using same numbers.

Instructions for Preparation of Images:

Please note: An image can refer to the following: Graphs, photographs, maps, charts, paintings, drawings, diagrams, etc. Images must be embedded within the manuscript text of the article. Once the article accepted for publication, the author may be asked for an image in high resolution file format. It is strongly recommended before embedding images in the manuscript, images must be prepared as mentioned below in the image specifications section.

Image specifications: Images must be prepared in accordance with the instructions mentioned on the PubMed Central website: <https://www.ncbi.nlm.nih.gov/pmc/pub/filespec-images/> The key factor for preparation of images for sufficient quality is images must have a minimum resolution of 300 dots per inch (dpi) for the grayscale (or black and white) and at least 600 dpi for colour scale. The acceptable image formats are tiff, jpeg, gif, psd or png.

Image Copyright: For any image that the authors have not made themselves, the authors will need to have written permission to reproduce that image, even if the image is posted on the internet. It is the authors responsibility to obtain permission to use the images, not the publishers. Permission must be obtained in writing before the article can be submitted.

2. Critical Review Articles/ Systematic Reviews / Meta-Analysis (Simple Reviews Are not considered for publication)

Reviews or Meta-Analysis articles should be systematic, critical assessments of most recently updated literature and data sources pertaining to basic biological or bio-medical science topics that include a statistical technique for quantitatively combining the results of multiple studies that measure the same outcome into a single pooled investigation. Data must be searched for and selected systematically for inclusion and critically evaluated, and the search and selection process for compiling the review must be mentioned. The text should NOT exceed 5000 words excluding references.

Each of the sections of these articles should include specific sub-sections as follows:

Structured Abstract: (Not exceed 250 words): Objectives, Methodology, Results and Conclusion.

Introduction: Rationale, Objectives and Research questions.

Methodology: Study design, participants, interventions, comparators, systematic review protocol, search strategy, data sources, studies sections and data extraction and data analysis/ statistical tools used.

Results: Provide a flow diagram / attractive/ figures /tables of the studies retrieved for the review, study selection and characteristics, synthesized findings and risk of bias.

Discussion: Summary of main findings, Limitations and Conclusions. For all other information including title page, typing and reference style, please follow the original article instructions.

Conclusion: It must be brief, less than 100 words with summary of the write up with future perspectives and applications.

References: Must be as per Harvard style, alphabetically arranged at the end using last author names with year in bracket. In review articles all references must have Pub Med, Web of Science, Clarivate Analytics, Scopus, Google Scholar, Cross Reference DOI live links.

3. Case Reports with Discussion

The case reports must contain genuinely new interpretational information, discussed with up to date literature. The reports should have clinical significance, new adverse effect(s) of a drug or other unique first time observations, etc. Patient consent for publication must be obtained from the patient in written or, if this is not possible, the next of kin before submission. The author(s) must have been involved in the care of the patient. Case Report/case series should contain a single paragraph summary and text should not exceed 2000 words (excluding summary, references, tables and figures) with maximum 10 bibliographic references and either three figures or three tables. Each case report/case series must contain:

- 1. Brief Abstract (should not exceed 120 words)**
- 2. Introduction**
- 3. Case Presentation**
- 4. Discussion**
- 5. Conclusion**
- 6. References, Patient consent, Competing interests, Funding Statement and Acknowledgements (if any).**

4. Rapid /Short Communications

Rapid/Special/Short communication should be original novel and new findings/ work such as complete results of a short pilot study, not merely a preliminary report and should not exceed 2000 words with one or two figures and/or one table. An editorial decision will be provided rapidly without reviews. For writing and references style, follow the same instructions listed above.

5. Letters to the Editor/Editorials / Perspectives / Correspondence

Opinions on topics and articles recently published in the journal will be considered for publication if they are objective and constructive in nature and provide academic interest to the readers. These letters may also be forwarded to the author of the cited article for possible response. The editor reserves the right to shorten these letters, delete objectionable comments, make other changes, or take any other suitable decision to comply with the style and policies of the journal. For writing and references style, follow the same instructions listed above.

Editorial will be written by senior members of the editorial board as solicited by the Editor-in-Chief or by invitation.. The editorial is generally a scientific review on one or two of the current topics pertaining to biomedical sciences. Correspondence and perspectives can be of general interest of current scientific scenario with path breaking ideas or concepts. Authors are encouraged to take up current exciting issues of global interest and write to the Editor for such communications.

Manuscript Submission: Biosc Biotech Res Comm Manuscript Processing Flow Chart

1. Manuscript Template: Biosc Biotech Res Comm Manuscript Template

2. Online submission: <https://bbrc.in/homepage/submit-article-2/>

3. Article Processing Charges (APC)

Bioscience Biotechnology Research Communications does not have any article submission charges, however authors will be required to pay article processing charges (APC), after acceptance of their peer reviewed manuscripts. The moderate APC taken from authors contributes to the handling/ editorial/ production / open access/ HTML/ DOI/ indexing costs and hence is non-refundable. APC is to be deposited via Net Banking/ Electronic Transfer after acceptance of the manuscript and the copy of the deposit receipt must be mailed to the editorial office.

- **Article Processing Charges (APC) for Authors from India- Rs. 6000/-**
- **Article Processing Charges (APC) for SAARC Countries - US Dollars 150**
- **Article Processing Charges (APC) for Low Income Countries- US Dollars 250**
- **For All other Foreign Countries the APC is US dollars 425**

In order to meet the rigorous academic standards on a fast track, the open access journal has some expenses as stated above, and for these reasons we charge a very modest article processing fee. Nevertheless, as we believe that lack of funds should not be a barrier to open access publication, Biosc Biotech Res Comm has a policy to provide significant waivers to deserving authors from middle and low income countries without any financial support. **Authors can request for a waiver in such cases.**

Note: For any hard copies of journals and reprints additional amount will be charged. Please contact the Managing Editor for details.

4. Conditions of Acceptance of Manuscripts

Acceptance of Manuscript: On acceptance, the editors retain the right to make stylistic changes in the MS, shorten the material as necessary and decide on the date of publication.

5. Galley Proofs: Authors will be sent an online copy of the galley proofs to the email id of only corresponding author. Corrections should be confined to typographical errors or matters of accuracy. **Authors should return their galley proofs within two days of receipt.** If there is a delay in returning the proofs beyond the given deadlines, no changes in the galleys will be possible thereafter.

6. Early on Line Ahead of Print Publication / Final Publication

Early on Line E- Prints, ahead of final publication, is made by Bios Biotech Res Comm to enable authors and readers to have early and rapid access to their published work.

Checklist for Authors

While Submitting Their Manuscripts

As part of the submission process, authors should carefully check their submission, using the below Check List for compliance with the following items as the manuscript will be returned to the authors as Incomplete Submission if any of the following points is missing.

- The main manuscript has been prepared after carefully reading the **Instructions to Authors** and authors have enclosed the Author Ethical Statement, Copy Right and Plagiarism-Check form along with the manuscript.
- The above forms should be downloaded from the website www.bbrc.in and must be filled and signed by all authors.
- The submission file format is in ~Microsoft Word document file and not a PDF.
- The text is double-spaced and is within the word limit of 4000 words or 20 pages with a 12-point font and *italics have been used only for scientific names.*
- A single manuscript word file has been submitted that contains title page (with all authors names, their addresses, email of corresponding author and ORCID link of all authors).
- This single file must have an **Abstract of 250 words** written under: brief introduction, objectives and rationale, methods, and brief results and conclusion. Write 5 key words below the abstract.
- Only 5 subheadings are required in the main MS: **Introduction, Material and Methods, Results & Discussion, Conclusion and References.**
- Ethics approval and consent to participate, competing interests, funding statement, acknowledgements (if any) must come before References.
- **All illustrations, figures, and tables are properly numbered and arranged between Results & Discussion. Size of a table must not be more than a page.**
- References should be written in text with AUTHOR LAST NAME WITH YEAR IN PARENTHESES () strictly as per **Harvard Style** of References.
- The references in the Bibliography /References Section must be alphabetically arranged using only the first author's last name as per Harvard style.
- Use of et al in Bibliography / References Section must only be used after writing three author names.
